## WHAT IS ENERGY HEALING?

**Wellness and health** is maintained through an optimal flow and balance of the human energy field. One's energy field is affected by both internal and external factors. Eventually, dis-ease can result due to imbalance and unhealthy flow. This holistic system of healing is a gentle yet powerful method of clearing, charging and balancing the energy field. This can help to restore health to one's physical, emotional, mental and spiritual bodies.

A Brennan Healing Science practitioner may **focus** their healing practice in areas such as the healthcare system, organization and business, children, the arts, education, animals, psychotherapy, spiritual guidance or channeling. You may want to ask if they have a particular specialty.

## WORKING WITH A BRENNAN HEALING SCIENCE PRACTITIONER MAY FACILITATE:

- Faster recovery from surgery and trauma
- Relief of pain and symptoms associated with many diseases
- Deep states of relaxation
- Decreased levels of stress, anxiety and depression
- Increased creative expression
- Enhanced self-esteem and sense of personal power in the now
- A heightened sense of well-being and joy
- Spiritual and personal development
- Appreciation for the diversity and wonder of life

## THE HEALING PROCESS

**Come and experience the relationship between the physical body and emotional, mental and spiritual health.**

A Brennan Healing Science Practitioner can help you access your innate and natural ability to heal. This can support you in achieving your personal potential and in living a meaningful, joy-filled life.

The healings support the energetic clearing of your field and help you develop a deeper understanding of yourself. As your understanding increases so does your ability to identify the major obstacles in your life. By tracing these obstacles back to their origins and releasing them with love, you can learn to free yourself from old patterns and behaviors that no longer serve your highest good. This is the process of healing.

## THE EXPERIENCE OF WHOLENESS

- Embodied awareness of the physical self
- Ability to feel and accept the full range of emotions
- Clarity, focus and understanding
- Healthy and more fulfilling relationships
- Sense of connection and purpose in life

## TESTIMONIALS

*"I definitely have felt a shift, especially how I look at myself now and how I was in the past. I do feel better about me and who I am. I am much more aware of my being: spiritually, emotionally, and physically. I have more tools in my toolbox to use on a daily basis when I do get stuck."*
